From any given point?in a straight line, to erect a perpendicular; or, to make a line at right angles with a given line. On each side of the point A, from which the line is to be made, take equal distances, as A b, A c; and from b and c as centres, with any distance greater than b A, or c A, describe arcs cutting each other at d; then will the line A d be the per-pendicular required. 2. When a perpendicular is to be made at or near the end of a given line. With any convenient radius, and with any distance from the given line A b, describe a portion of a circle, as b A c, cutting the given point in A; draw, through the centre of the circle n, the line b n c; and a line from the point A, cutting the intersections at c, is the perpendicular required.
