

Expression of p53, Cyclin-D1 & EGFR in oral squamous cell carcinoma

By Gupta, Seema / Khan, Huma

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Molecular Marker Expression in Oral Cancer | Oral cancer pathogenesis is a complex process involving genetic alteration during multistep carcinogenesis, growth regulation, apoptosis, immortalization, angiogenesis, invasion and metastasis. Molecular markers such as p53, Cyclin-D1 and EGFR regulate cell cycle and play important role in tumor progression and development. The present study evaluates the expressions of these molecular markers & its prognostic significance with treatment response in oral cancer patients undergoing chemoradiation. The strong positive expressions of p53, Cyclin-D1 and EGFR showed significantly lower survival as compared to negative or moderate positive expressions. Hence, expression of p53, Cyclin-D1 and EGFR may serve as a prognostic marker in oral cancer patients. | Format: Paperback | Language/Sprache: english | 64 pp.

Reviews

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Brennan Koelpin

Comprehensive guide! Its this type of very good read through. It is actually writter in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Bernie Mante PhD
