SCIENCE, SEEDS AND CYBORGS: BIOTECHNOLOGY AND THE APPROPRIATION OF LIFE (HARDBACK)

Verso Books, United Kingdom, 2003. Hardback. Condition: New. Language: English . Brand New Book. Molecular biology is the queen of modern science, a leading force in the new knowledge economy, and a competitor to the explanatory power of the arts and humanities. But are genes really the definitive cause of the development and functioning of organisms, of health and illness, life and death, success and failure? Can the genomes of living things be engineered like machines, reprogrammed to behave according...

Reviews

This publication can be well worth a study, and far better than other. Better then never, though i am quite late in start reading this one. Its been printed in an exceedingly simple way and it is only soon after i finished reading through this book in which really transformed me, alter the way in my opinion.
