

The Construction of Lombard and Gothic Vaults (Classic Reprint) (Paperback)

Filesize: 1.19 MB

Reviews

It is one of the best books. Indeed, it really is a play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Sofia Yundt)

THE CONSTRUCTION OF LOMBARD AND GOTHIC VAULTS (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD**

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Construction of Lombard and Gothic Vaults The desire to economize wood led to the introduction of the rib vault, not only in France, but in Lombardy as well, where, indeed, the French doubtless learned the construction. The Lombards carried the principle so far that, in certain cases, wood was entirely dispensed with in the edifice, various expedients being found to erect even a roof without it. In regions where wood was abundant, however, vaults were erected with centering, and in these regions the rib vault was never employed. It is evident that the Lombards used the rib vault not from any preference for the form, but solely because it could be constructed without centering. Rib vaults therefore were invented in Lombardy as a simple device to economize wood. They were adopted by the French builders for the same purpose. The same desire to dispense with temporary wooden substructures governed the development of architecture during the entire transitional period, and eventually lead to the birth of Gothic. If space permitted, it would be interesting to trace across the centuries the chronological development and growth of this principle. I shall, however, confine myself to a demonstration of the fact that the principle existed, beginning with a brief summary of certain known methods of vault construction used by the Roman and Byzantine builders, since these are analogous to, and partly explain, medieval constructions. I shall then take up the rib vaults of France, of which the study offers less difficulty Since there is extant an abundant series of well preserved monuments. The French principles of construction once understood, it will not be difficult to see that the Lombard methods...
