

## Case Studies in Contracting and Organization

By -

Oxford University Press. Paperback. Condition: New. 360 pages. Dimensions: 9.2in. x 6.1in. x 1.0in. Case Studies in Contracting and Organization is an edited collection of empirical studies from the transaction-cost economics literature on contracting and organization. Derived from the work of Ronald Coase, 1991 winner of the Nobel Prize in Economics, Olive Williamson, and other transaction-cost economists, the studies explore such fundamental organizational issues as the role of reputation, the purpose and limitations of contracts, the nature and boundaries of the firm, and the evolution and role of hybrid organizational forms such as franchising, leasing, and joint ventures. Industries covered include aerospace, automotive, electric power generation, fast food, natural gas, ocean shipping, petroleum, coke refining, rail transportation, soft drink distribution, shoe manufacturing, and tuna processing. An introductory chapter provides an overview of transaction-cost reasoning and a summary of each study's contributions to our understanding of the problem of economic organization. The relatively nontechnical nature of the readings makes the book accessible to business and law students as well as advanced undergraduate and graduate students of economics. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
