

Perspectives and Problems in Nonlinear Science

By -

Springer. Hardcover. Condition: New. 443 pages. Dimensions: 9.7in. x 6.1in. x 1.0in. Lawrence Sirovich will turn seventy on March 1, 2003. Larrys academic life of over 45 years at the Courant Institute, Brown University, Rockefeller University and the Mount Sinai School of Medicine has touched many people and several disciplines, from fluid dynamics to brain theory. His contributions to the kinetic theory of gases, methods of applied mathematics, theoretical fluid dynamics, hydrodynamic turbulence, the biophysics of vision and the dynamics of neuronal populations, represent the creative work of an outstanding scholar who was stimulated mostly by insatiable curiosity. As a scientist, Larry has consistently offered fresh outlooks on classical and difficult subjects, and moved into new fields effortlessly. He delights in what he knows and does, and sets no artificial boundaries to the range of his inquiry. Among the more than fifty or so Ph. D. students and post docs that he has mentored, many continue to make first-rate contributions themselves and hold academic positions in the US and elsewhere. Larrys scientific collaborators are numerous and distinguished. Those of us who have known him well will agree that Larrys charm, above all, is his taste, wit, and...

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Otis Wisoky**

This publication is great. It is full of wisdom and knowledge. You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).
