HARVARD UNIVERSITY PRESS, United States, 2003. Hardback. Condition: New. New. Language: English . Brand New Book. North America s fastest mammal, the pronghorn, can accelerate explosively from a standing start to a top speed of 60 miles per hour - but it can also cruise at 45 miles per hour for many miles. What accounts for the speed of this extraordinary animal, a denizen of the American outback, and what can be observed of this creature s way of life? And what is it like to be a field biologist dedicating twenty years to studying this species? Here, John A. Byers answers these questions as he draws an intimate portrait of the most charismatic resident of the American Great Plains. The National Bison Range in western Montana, established in 1908 to snatch bison from the brink of extinction, also inadvertently rescued the largest known remnant of Palouse Prairie. It is within this grassland habitat - home to meadowlarks, rattlesnakes, bighorn sheep, coyotes, elk, snipe and a panoply of wildflowers - that Byers observes the pronghorn s life from birth to death (a life often as brief as four days, sometimes as long as fifteen years) and from season to season. Readers will also experience the vicarious pleasures of a biologist who is eager to race a pronghorn in his truck, scrutinize bison dung through binoculars and peer through the gathering dusk of a rainy evening to count the display dives of snipe. A memorable tale of a scientist s twenty-year encounter with a magnificent animal, the story of the pronghorn is also a reminder of the crucial role we can play in preserving the fleeting live of the American grassland.
