CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 192 pages. Dimensions: 9.0in. x 6.0in. x 0.4in. The earth has some of the most dynamic weather. Extreme weather can be a matter of life and death for aviators. Aviators must know and understand the science behind weather. All that has changed now. This book looked upon as the bible of weather flying; it makes complex weather concepts understandable for even the least experienced aviators, and cover new technologies. It is published with the national weather service (NWS) and the federal aviation administration (FAA) in mind includes the coded weather reports, weather prediction such as tropical cyclones, volcanic ash etc. Communications technology and Radar satellite imaging have put a tremendous amount of life-saving weather-related data at a pilots disposal. This book addresses those issues about weather flying that you wont get even after taking courses and reading the FAA Handbook on weather. Plus, it takes a different approach in explaining the practical nature of weather and how to apply it when flying. It covers everything from the daily weather patterns to meteorological warming and weather prediction. This book is a vital tool for those who want to better understand how weather works and how it affects the aviators lives. This item ships from La Vergne, TN. Paperback.
