CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 82 pages. Dimensions: 9.0in. x 6.0in. x 0.2in.LT Albert Cruzs forensic entomologyexplosive (E2) scientific project proved to be cutting edge and groundbreaking science in the forensic community. His thorough research and original analysis included a newly found forensicintelligence analytical tool which could help bring justice, fight the war on terrorism, and find ground truth in cases which involve domestic and international terrorism, war crimes, torture, drug trafficking, and chemical explosive identification by utilizing the common carrion fly. In addition, the project may be effective in counter-denial and deception operations which are known to be highly relevant and valuable to the Intelligence Community (IC) in cases of deceptive mass grave movement and genocide. More importantly, this unique forensic E2 experimental project revealed that explosive compounds such as TNT could be detected biologicallyin this case by blowfly larvae which have fed on body tissue exposed to explosive residueswhen toxicological analysis was no longer procurable. The results of the unique E2 forensic experiment provided empirical evidence that forensic entomology is unbiased and has a high degree of applicability to the IC. The science here is very helpful and when applied strategically to international war crime cases can provide myriad answers and help bring the guilty to justice in any war crime tribunal court system. Such information gained would also enable analysts to identify a specific batch of explosive, compare it to a known source of TNT, and relate it to a terrorist crime or cell. This item ships from La Vergne,TN. Paperback.
