Botanical Series Volume 2

By Field Museum of Natural History

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 edition. Excerpt: .receding border of a mangrove colony. The exception is Key B of the Marquesas group, where it is present notwithstanding the fact that the mangrove is entirely absent; and Marquesas Keys F and I, and Man and Ballast Keys, where although the mangrove colony borders seem especially suitable to its growth, the Laguncularia has not yet, at least, become implanted. Opuntia Dillenii: This common Antillean cactus is one of the most readily avevectent species. Its implantation on Bird and Garden Keys is therefore not at all unnatural. Although, from its location on Loggerhead Key, the introduction of the species might well be supposed to be homovectent, yet, as I have noted its presence on other tropic sand keys where of a certainty man would not have planted nor even conveyed it, I feel justified in considering the presence of the plant also natural in...
