General Books. Paperback. Book Condition: New. This item is printed on demand. Paperback. 176 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904. Excerpt: . . . seeds and plants, and why plants find it desirable to migrate from place to place. There are sixty-six illustrations. An excellent feature of the book is the mention of many plants in each section besides those treated which the student can investigate for himself. Both these books are worth a place in the library of the botanist and will be especially useful to teachers of Nature study. They are published by Ginn and Co. , Boston. The poet has called butterflies winged flowers and thus these insects should come in for a share of the botanists attention. There is probably no branch of science that is nearer to ecological botany than entomology, in fact, if it were not for the insects we should soon be minus our showy wildflowers, and dependent upon the clumsy makeshifts of the gardener for many of our finest fruits and vegetables. There are few botanists that are not entomologists to the extent of knowing the most noticeable bees, butterflies and moths, at least, and none that should lack this information. We take pleasure, therefore, in recommending Comstocks How to Know the Butterflies to those who would get acquainted with these insects. The forty-five plates in this book representing the butterflies in their natural colors are of themselves nearly sufficient for the identification of the various species, but these are supplemented by an accurate and comprehensive text in which the caterpillar as well as the mature insect is described and the...
