The book s foreword, by William Keat, PhD, professor at Union College on Carlton Chin: The predictive power of mathematics . along with his joy of competition, underpins his unique professional journey from predicting material behavior as an engineering student at MIT, predicting human behavior as . nationally known financial analyst, to predicting athletic performance as author and contributor to the New York Times. An athlete is his own right, numbers and statistics are Carlton s means to a greater understanding of the sports he loves. In my own experience as a teacher of engineering, I know that the converse is also true, that sports can be used to inspire a greater understanding of science and mathematics.
