Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Foreign Crops and Markets, Vol. 41: September 3, 1940 Early harvesting returns of the 1939-40 corn crop are reported to have substantiated the June production estimate of 319 million bushels. The quality of the grain was, however, somewhat reduced by the heavy rains of June and July in the Provinces of Santa Fe and Cordoba, where corn cribs are mostly uncovered, and shelling has been generally delayed. The surplus available for export was officially estimated on August 16 at about 283 million bushels, which is in line with current trade statistics and estimated domestic requirements. Exports have been greatly reduced this season as a result of the European war, but the price fixed for Government purchases will assure the farmer returns above the level of domestic quotations since the beginning of the marketing year.
