

## Yamaha Rhino

By Lambert M. Surhone

Betascript Publishing. Taschenbuch. Condition: Neu. Neuware - The Yamaha Rhino is an off-road vehicle made by Yamaha Motor Company. The 2-person four-wheel drive vehicles are in a unique class called 'Side by Side', which is in-between the size of ATVs and Jeeps. The Rhino is gaining popularity in racing with customizations similar to the full-size vehicles. Polaris and Arctic Cat have made vehicles in the same class. The basic premise involves the chassis, engine, transmission, suspension and basic characteristics of a large utility 4x4 ATV, but with two side by side bucket seats with seat belts and a ROPS certified structure. The controls are similar to those of a golf cart, with pedals and a steering wheel rather than the handlebars of a conventional ATV. It is mainly targeted for general utility and recreational use by farmers, ranchers and hunters. It is also popular with some disabled people as a means to get to places inaccessible by wheelchair. The Rhino's maximum speed is 41 mph (66 km/h). 112 pp. Englisch.
