

CHEMICAL PRINCIPLES

By Zumdahl, Steven S.

Houghton Mifflin (Academic), 2001. Book Condition: new. Hardcover. 4th Revised Edition. Book-MINT, unread, still in shrink wrap. 10.5x8. 1047pp. CD/Rom included. The 4th of Steven Zumdahl's Principles text continues his unique approach to the teaching of a more challenging general chemistry course. By teaching students to look at observations first, then discuss the models that have been constructed to explain the observation, his approach has been highly acclaimed by tutors throughout the world. This new edition sees the combination of the Biochemistry and Organic Chemistry chapters into 'Organic Chemistry with Polymers' which reflects the actual coverage of these topics in most courses. Additionally, a significant number of new, boxed essays have been included, presenting everyday applications of chemistry. The popular end-of-chapter Challenge Problems enable instructors to tailor problem assignments to the level appropriate for their students. Accompanying the text is the General Chemistry Interactive CD Rom allowing students to brush up on basic concepts.

Reviews

The publication is easy in read through safer to comprehend. It is actually loaded with wisdom and knowledge Its been printed in an extremely simple way and is particularly simply right after i finished reading through this pdf where actually modified me, affect the way i believe.

-- Ms. Clementina Cole V

This is the very best publication i have got read until now. It is definitely simplified but shocks within the fifty percent of the pdf. You may like how the article writer create this pdf.
