Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. Rafael Ferran (illustrator). 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Professor Mayer has invented a series of experiments in Light which are described by Mr. Barnard. Nothing is more necessary for sound-teaching than experiments made by the pupil, and this book, by considering the difficulty of costly apparatus, has rendered an important service to teacher and student alike. It deals with the sources of light, reflection, refraction, and decomposition of light. The experiments are extremely simple and well suited to young people. Westminster Review. This work describes, in simple language, a number of experiments illustrating the principal properties of light, by means of a beam of sunlight admitted into a dark room, and various contrivances. The experiments are highly ingenious, and the young student cannot fail to learn a great deal from the book. As an example of the effective experimental method employed, we may specially mention the device for illustrating the refraction of light. This book is specially designed to give to every teacher and scholar the knowledge of the art of experimenting. The Quarterly Journal of Science (London). A singularly excellent little hand-book for the use of teachers, parents, and children. The book is admirable both in design and execution. The experiments for which it provides are so simple that an intelligent boy or girl can easily make them, and so beautiful and interesting that even the youngest children must enjoy the exhibition. The experiments here described are abundantly worth all that they cost in money and time in any family where there are boys and girls to be entertained. New York Evening Post. The experiments are capitally selected, and equally as well described. The book is conspicuously free...
