CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 168 pages. Dimensions: 11.0in. x 8.5in. x 0.4in. Waste Management for Deployed Forces provides guidance on conducting waste management operations while deployed and focuses on brigade level and below. It provides a better understanding of the waste streams generated during operations and provides guidance on minimizing the harmful effects of waste on human health, the environment, and the mission. It describes the planning necessary to estimate generated waste, based on unit functions and activities and provides guidance on generating and implementing waste management solutions to fulfill immediate and long-term requirements. While aimed at engineers, logisticians, transporters, environmental officers, preventive medicine (PVNTMED) personnel, and others who are primarily involved in waste management, it will enlighten commanders and staffs regarding the need to consider the waste generated during each phase of the operation and the importance of incorporating waste management during planning. This manual is a compilation of techniques and procedures found in doctrine, lessons learned, and other reference material; it also serves as a how to guide for performing waste management at the tactical level. Because each situation will be uniquely different, based on operational and mission variables, this manual relies on the readers ability to apply experience, common sense, and good judgment in generating options and implementing solutions that will reduce the harmful effects of waste on human health and the environment to the fullest extent possible. This manual is best used in combination with the subject matter expertise that resides within, or is available through, higher headquarters, supporting units, or reachback. A key reference and keystone document for this manual is Environmental Considerations. Recent experiences in Iraq and Afghanistan have demonstrated some of the consequences when waste generation is not considered early in the planning...
