DEVELOPMENT OF CONDUCTING POLYMER BASED NUCLEIC ACID BIOSENSORS

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Application of Conducting polymers for detection of genotoxigants and Mycobacterium tuberculosis | Nucleic acid biosensors have been found to have interesting possibilities for applications in various fields including environmental and medical screening. The two types of analysis used for the nucleic acid biosensors are : (a) detection of genotoxigants/ DNA damage (b) detection of DNA hybridization. For the detection of genotoxigants, the double stranded calf thymus DNA has been electrochemically entrapped into...
