Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Alternating Currents, Vol. 2 The present is the second section of the notes on alternating currents intended as a guide to a student attending a three-term course on the subject. The aim is to give him a concise introduction to the main principles involved, so as to enable him to proceed to works on design such, for example, as Professor Miles Walker's Specification and Design of dynamo-electric Machinery. The author must express his obligation to Professor Miles Walker for his permission to have Fig. 82 reproduced, and to the Weston Electrical Instrument Company for Fig. 60. His sincere thanks are also due to Mr F. J. Dykes, m.a Fellow and Tutor of Trinity College, for much useful criticism and for kindly revising the proofs, and to Mr J. B. Peace, m.a the University Printer. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
