This work, as its title indicates, does not claim to be more than an introduction to the subject, and no attempt has been made at exhaustive treatment. Following what has appeared to me to be the most lucid method of presentation, I have divided the subject into three parts: descriptive, theoretical, and practical; the last being added in the hope that the comparatively simple experiments described may be of interest to those wishing to investigate for themselves some of the remarkable properties of the radio-active elements. Frequent reference has been made to Professor Rutherford's treatise, and I am indebted to this valuable work for several numerical determinations. I also wish to express my thanks to Mr. F. H. Glew for the radiographs illustrating reversal by radium rays and secondary radiation. About the Publisher...
