Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

CHEMICAL ANALYSIS - INDEX - PREFACE - In this book I have endeavored to present a comprehensive treatment of the manufacture and analysis of carbonated nonalcoholic beverages or carbonated soft drinks as they are commonly called. Each category of the raw materials used in these beverages is considered, namely, sugars and syrups, artificial sweetening agents, acids, water, flavors and flavoring, including specialty and fruit flavors and also flavor emulsions both of the clear and cloudy type, colors and coloring, and carbon dioxide. The actual manufacturing steps are described in detail in the chapter on bottling and canning and, in this connection, bottle washing, caustic solution preparation, plant layout, plant housekeeping, and sanitation are discussed in detail. The composition of the finished beverages by categories is considered. The various types of spoilage that may occur and the means for the prevention of such spoilage are treated in another chapter. Finally the methods of analysis both for control during manufacture and for the determination of composition are detailed. I acknowledge with thanks the cooperation given to me by the American Bottlers of Carbonated Beverages and by several firms. These acknowledgements are given specifically in the text. It may be noted that reference is made to American Bottlers of Carbonated Beverages, the United States...
