Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

BRAIN STIMULATION AND LANGUAGE (PAPERBACK)

Taylor Francis Ltd, United Kingdom, 2013. Paperback. Condition: New. Language: English . Brand New Book. Focal brain stimulation to enhance human cognitive and language functions in both healthy individuals and those with aphasia is a relatively new and exciting area of research. In this special issue leading authors in the field present novel data and summarize the evidence related to the use of transcranial magnetic stimulation (TMS), transcranial direct current stimulation (tDCS) and epidural cortical stimulation. These techniques are used not only for understanding normal brain-language functions but also language learning and recovery after brain damage. The first brain stimulation trials in aphasia rehabilitation are then investigated along with suggested directions for future research.
