CONTRIBUTIONS TO THE DESIGN OF MULTIPLIER AND RF MIXER CIRCUITS

Vde Verlag Gmbh Jun 2015, 2015. Taschenbuch. Condition: Neu. Neuware - This thesis discusses the systematic design of mixers with a focus on the characterization of nonlinearity. Since multiplication is considered here as the core operation for implementing a frequency conversion, the first part of this work handles the electronic realization of multiplication. Based on a simple mathematical model for multipliers the 'Multiplication Purity Index (MPI)' is proposed as a quality factor for the characterization of the undesired nonlinear behaviour...

Reviews

This publication is definitely worth buying. It can be loaded with wisdom and knowledge I am easily could possibly get a satisfaction of looking at a composed publication.

-- **Rhiannon Steuber**

Very helpful to all type of individuals. It really is rally interesting through looking at time. Its been designed in an extremely basic way which is just soon after i finished reading this pdf through which basically modified me, change the way i believe.
