We exercise, eat right, yet still don't seem to make a difference where it counts--on the scale. In this situation, it is natural to wonder what you are doing wrong. Not seeing results often leads us to question ourselves, causes us to blame ourselves. But you can eat right, exercise, and still not see results, because you are not eating the right FOODS! This is the theory behind carb cycling, an extremely effective diet in reducing body fat because it teaches us how we should eat. Deanna Massey delves deep into this incredible diet, separating the truth from the hopes, while putting together the best plan for anyone to achieve their weight loss goal. Make the change to a carb cycling diet today and finally start to lose the weight.
