Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Geography in Its Relation to History: A Lecture Delivered at the Birkbeck Institution I will not affirm that the relationship which geography bears to the records of human action in past ages offers the most attractive of the many aspects under which the subject may be regarded, though it would not be difficult, I think, to make out a strong case in support of such an assertion. Nor am I by any means sure that the historical relationships of geography are those that find most favour with professed cultivators of geographical science in the present day. There is a tendency, in some quarters, to speak of physical geography as the only geography worthy to be ranked as a science, and to regard other branches of the study as of inferior value, and as consequently entitled to little esteem. I hold this tendency to be founded upon an erroneous conception of what geography really is. And to involve an imperfect estimate of the place which physical geography occupies (or rather should occupy) in the general scheme of geographical study. The truth is, that all geography, if it be worth the name, is physical, or natural that is to say, is based upon a correct description of the earth's natural features and aspects, climates and productions. Physical geography is neither a new subject nor a separate subject, although the vastly increased and still increasing body of facts bearing upon the natural aspects and phenomena of the globe, which have been accumulated within modern times, have formed the material from which extended generalizations, unknown to former ages, have been derived, and the relationships between geography and other branches of...
