Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from **I/S Charge-Out Systems: Options and Personnel Implications** Over the coming decade market competition will require that Information Systems (I/S) charge-out systems be based on competitive market prices. Gone are the days when I/S were the quasi- exclusive domain of comptrollers offices. I/S users now include a wide range of departments and/or divisions. Computer automation and rationalization is no longer limited to financial planning, spread sheets and pay checks. Management decision making is more and more frequently linked to corporate data bases, including decision support software. Paralleling the expansion of I/S applications has been a shift from a supply-driven to a demand-driven I/S environment. As more user departments encroach on the turf of the I/S professional, it becomes less feasible for I/S departments/divisions to dictate the terms of their products and services. User sophistication and the proliferation of mini- and micro-computers combine to render simple cost-displacement I/S charge-out systems obsolete. I/S departments already find themselves pressured to focus on greater efficiency and cost-effectiveness. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
