Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Electrical Aids to Greater Production: Plans, Methods and Appliances by Which Industrial Electrical Engineers Are Meeting Increased Demands for Power Eighty per cent. Of -the power used in making munitions has to be applied electrically. The Great War has brought to the engineer in the industrial plant, to the chief electrician of such plants and to the consulting engineers at work in laying out and designing the electrical equipment for industrial work, many new Opportunities. Emergency power needs have been supplied, additions and alterations to wiring systems to carry added loads, extensions have been built, all with the general idea of helping to increase factory output and hold down factory costs. The war indeed has emphasized the inherent economy and exibility of electricity as a method of driving all classes of machinery and has stimulated greatly the application of electricity for lighting and power. This volume is written out of the experiences of the men who have been engaged in this work. Electrical World from week to week has presented articles on application of electricity to plants, taking up the problems of installation and maintenance as well as the problems of layout and control. In this volume, the best of this practice has been assembled to provide for the work of reconstruction now upon us a back ground of practical suggestions to help install, Operate and maintain electrical equipment in different classes of industries. The material has been chosen and edited, not to make a text book, but rather a practical handbook of methods, schemes and plans which can be lifted out and adapted to a wide variety of conditions. About the Publisher Forgotten Books publishes hundreds of...
