Forgotten Books, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Setab: An Edit/Insert Program for Automatic Typesetting of Spectroscopic and Other Computerized Tables Except for two read statements the program is written in a subset of ansi fortran. No logical statements are used, since the format of these deviates from the standard on some computers. Particular care was taken to make it machine independent with respect to internal bit configuration and as system independent as possible. The logical unit numbers designating the system card reader, printer, card punch and tape drives differ not only from machine to machine, but also from installation to installation. Therefore some changes will probably be necessary if this program is to be used at any other installation. In order to minimize the modifications required in implementation, the input and output devices are designated by variables which are defined at the beginning of the program. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
