Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Charles Darwin changed the world after sailing on a boat called the Beagle and finding Iguanas that swam in the ocean, he came up with our current theory of Evolution - Survival Of The Fittest. The newest discovery of Evolution comes to us from a journey through the largest and most expensive scientific experiments in history and shows us the workings of the God Particles and how these tiniest of parts of the sub-atomic world are responsible for everything that happens to you on a minute-by-minute basis. Full of amazing new Science that you have never before seen or heard, this new theory of Evolution surpasses anything imagined before. You will see the universe as what it truly is - a machine for the creation of life. In the first seconds of The Big Bang - which I call The Big Birth, because there wasn't much of a Bang at the beginning of everything but there may have been a Cry - a single force sent all the sub-atomic particles spinning, which in turn started all of the molecules spinning, which in turn started all of the planets spinning. When the planets started spinning, they created life and the proof is in the double-helix design of our DNA. We have cracked the code. If you thought you knew everything you needed to know about Evolution, God and your own path through the universe - prepare for a huge shock. You have learned only about the most superficial levels of reality. In this new book by a master craftsman you will find the reason you exist, where you truly come from, how your life is...
