Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: . . . Adams ascended Mt. Loa, at a time when the light at the summit was unusually brilliant. He found the fountain playing, he says, to a height of 200 to 500 feet, and assuming all the forms of a grand fountain of water. 1875, January. --Mr W. L Green mentions the occurrence of summit action at this time for a month, in his tabular statement of eruptions, and says nothing of one in August of this year, to which date Mr. Coan refers the 1875 eruption. The report of the Challenger sustains Mr. Coan's statement, but does not positively set aside that of Mr. Green. 1875, August. --Mr. Coan says: I think it was on the 11th of August that the summit crater was again in brilliant action. The action continued, as appeared in the view from Hilo, for one week, and without any observed evidence of an outflow. In the first half of August, the day not stated, a party from the Challenger Expedition visited Kilauea. As reported in volume I of the Scientific Results of the Expedition, p. 766, a globular cloud was seen over the summit of Mt. Loa, which was perpetually reformed by condensation, and had a brilliant orange glow at night, looking as if a fire were raging in the distance. Hawaiian Gazette, Sept. . , 1873. f Coan, this Journ. xiv, 68, 1877, letter of March 17, 1877. 1876, February 13. --Another grand display from the summit crater, but of..
