e)Pedagogy - Visual Knowledge Building : Rethinking Art and New Media in Education

By Stefan Sonvilla-Weiss

Peter Lang Aug 2005, 2005. Taschenbuch. Condition: Neu. Neuware - The accelerating «iconic turn» in our society today increasingly demands the interactive representation of contextual knowledge. At the same time the use of Web based learning environments highlight the audio-visual dimension of (e)pedagogy and the move towards practical, project-oriented curricula. Regardless of the educational field pedagogical expertise thus requires more and more understanding and control of visual elements and their interpretations. There is a growing need for visually oriented pedagogical experts such as teachers, tutors, designers and developers who are capable of community knowledge building and collaboration with other experts from different fields from both private and public sectors. The book intends to illuminate scientific and programmatic excerpts from an international community of researchers, practitioners, teachers and scholars working in interrelated fields such as Aesthetic Education, ePedagogy Design - Visual Knowledge Building, Visual Education, Art Education, Media Pedagogy and Intermedia Art Education. 246 pp. Englisch.

Reviews

Complete guideline! Its this type of great read through. it absolutely was writtern quite perfectly and helpful. I am very happy to explain how this is basically the best book i actually have read through during my personal life and can be he very best book for at any time.
-- Joshua Gerhold PhD

A very awesome book with perfect and lucid reasons. It really is basic but shocks within the 50 percent of the book. Its been designed in an exceptionally easy way and is particularly merely right after i finished reading this ebook where in fact changed me, change the way i think.
