# IN VIVO FOOTPRINTING

Elsevier Science. Hardcover. Condition: New. 222 pages. Dimensions: 9.1in. x 6.3in. x 0.8in. The revolution in biological research initiated by the demonstration that particular DNA molecules could be isolated, recombined in novel ways, and conveniently replicated to high copy number in vivo for further study, that is, the recombinant DNA era, has spawned many additional advances, both methodological and intellectual, that have enhanced our understanding of cellular processes to an astonishing degree. As part of the subsequent outpouring of information, research...
