

Erich Jantsch (Paperback)

By -

Aud Publishing, United States, 2011. Paperback. Condition: New. Aufl.. Language: English . Brand New Book. Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Erich Jantsch (1929-1980) was an Austrian astrophysicist. In the mid-1960s his increasing concern regarding the future led him to study forecasting techniques. He does not believe forecasting or science can be neutral. Jantsch s Gauthier Lectures in System Science given in May 1979 at the University of California in Berkely became the basis for his book The Self-Organizing Universe: Scientific and Human Implications of the Emerging Paradigm of Evolution, published by Pergamon Press in 1980 as part of the System Science and World Order Library edited by Ervin L szl . The book deals with self-organization as a unifying evolutionary paradigm that incorporates cosmology, biology, sociology, psychology, and consciousness. Jantsch is inspired by and draws on the work of Ilya Prigogine concerning dissipative structures and nonequilibrium states.

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better then never. I found out this book from my dad and i encouraged this pdf to find out.

-- Justus Hettinger
