

## Mathematical Questions and Solutions Volume 39

Filesize: 5.8 MB

### ***Reviews***

*An exceptional book as well as the font applied was fascinating to learn. It is loaded with knowledge and wisdom I am just easily can get a pleasure of studying a created book.*

*(Dr. Benjamin Lakin)*

## MATHEMATICAL QUESTIONS AND SOLUTIONS VOLUME 39

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 Excerpt: . by Dr. Curtis; E. Ruttee; and others. This, which is known as Alhazen's problem, admits of the following geometrical solution: --If  $C$  be the centre of the circle and  $a$  its radius, take  $E$  and  $F$  so that  $AC \cdot CE = a^2 = BC \cdot CF$ ; draw the hyperbola-locus of vertex of all triangles whose common base is  $EF$ , and the difference of whose base angles =  $\angle CEF - \angle CFE$ ; let  $H$  be any one of the four points in which this hyperbola cuts the circle; then, as  $\angle ZEFH - \angle FEH = \angle CEF - \angle CFE$ , we have  $\angle ZCEH = \angle CFH$ , and in the triangles  $ACH, HCE$ , we have  $AC : CH = CH : CE$ , therefore  $\angle AHC = \angle CEH$ ; similarly  $\angle BHC = \angle CFH$ , and therefore  $\angle AHC = \angle BHC$ , and  $\angle AHK = \angle BHK$ , therefore  $H$  is one of the required points. 6924. (By Professor Seitz, M.A.)--A triangle is formed by joining three random points within a sphere; prove that the average area (1) of the triangle is  $\frac{1}{2} \pi r^2$ , and (2) of its inscribed circle is  $(\frac{1}{2} \pi r^2) \log 2$ . 6917. (By J. L. Mokenzie, B.A.)--A straight line  $XY$  cuts the tangents at two given points  $A$  and  $B$  on a given circle in  $L$  and  $M$  respectively, and the circle itself in  $C$  and  $D$ ; then (1) if the circles  $ABL, ABM$  cut  $XY$  in  $a$  and  $b$  respectively, prove  $Ca = D/3$ ; and (2) if the circles passing through  $L$  and  $M$ , and touching...
