THE BOUNDARIES OF BABEL: T HE BRAIN AND THE ENIGMA OF IMPOSSIBLE LANGUAGES (HARDBACK)

DOWNLOAD PDF

MIT Press Ltd, United States, 2008. Hardback. Book Condition: New. 230 x 156 mm. Language: English . Brand New Book. In *The Boundaries of Babel*, Andrea Moro tells the story of an encounter between two cultures: contemporary theoretical linguistics and the cognitive neurosciences. The study of language within a biological context has been ongoing for more than fifty years. The development of neuroimaging technology offers new opportunities to enrich the biolinguistic perspective and extend it beyond an abstract framework for inquiry. As a leading theoretical linguist in the generative tradition and also a cognitive scientist schooled in the new imaging technology, Moro is uniquely equipped to explore this. Moro examines what he calls the hidden revolution in contemporary science: the discovery that the number of possible grammars is not infinite and that their number is biologically limited. This radical but little-discussed change in the way we look at language, he claims, will require us to rethink not just the fundamentals of linguistics and neurosciences but also our view of the human mind. Moro searches for neurobiological correlates of the boundaries of Babel -- the constraints on the apparent chaotic variation in human languages -- by using an original experimental design based on artificial languages. He offers a critical overview of some of the fundamental results from linguistics over the last fifty years, in particular regarding syntax, then uses these essential aspects of language to examine two neuroimaging experiments in which he took part. He describes the two neuroimaging techniques used (positron emission topography, or PET, and functional magnetic resonance imaging, or fMRI), but makes it clear that techniques and machines do not provide interesting data without a sound theoretical framework. Finally, he discusses some speculative aspects of modern research in biolinguistics regarding the impact of the linear structure of linguistics...
