

Atmospheric Corrosion (Hardback)

By Thomas Graedel, Christofer Leygraf

John Wiley Sons Inc, United States, 2000. Hardback. Condition: New. New. Language: English . Brand New Book ***** Print on Demand *****.A new scientific focus on the corrosion process and its amelioration While atmospheric corrosion has been studied by engineers for nearly a century, a systematic scientific investigation of this vital field has become possible only in recent years. In this timely and authoritative work, Christofer Leygraf and Thomas Graedel present a comprehensive look at atmospheric corrosion six thousand years after iron was first separated from its ore . and promptly began to corrode! Combining expertise in corrosion science and atmospheric chemistry, Leygraf and Graedel describe corrosion s potentially devastating effects on structures and materials, examine the latest scientific tools available for preventing or minimizing corrosion damage, and emphasize new insights obtained over the last decade through controlled studies as well as computer modeling investigations. Key topics include: Basic principles of atmospheric corrosion chemistry Corrosion mechanisms in controlled and uncontrolled environments Degradation of materials in architectural and structural applications, electronic devices, and cultural artifacts Protecting existing materials and choosing new ones that resist corrosion Predicting how and where atmospheric corrosion may evolve in the future Complete with appendices discussing experimental...

Reviews

This pdf is really gripping and intriguing. it was actually writtern very completely and beneficial. You wont really feel monotony at whenever you want of your time (that's what catalogues are for about in the event you request me).

-- Ms. Gracie Nicolas

A very awesome ebook with perfect and lucid information. It is really simplified but unexpected situations in the 50 % of your pdf. I am pleased to let you know that here is the greatest book i have study inside my very own lifestyle and can be he greatest ebook for at any time.
