Nevertheless, the succession of rhythmic cleavages, relation of successive cleavage-planes, etc., point to the operation of factors which are counterparts of those operating in a half of the normal embryo. Later development. The embryo is now complete, and gives rise to a complete blastula and larva. Although the process of gastrulation has not been carefully observed, enough of the later development has been ascertained to prove that a larva arises which resembles the normal larva, except as regards its smaller size and certain minor defects. My results, therefore, are entirely confirmatory of those of Driesch upon Phallusia. C.--Cleavage of the blastov1eres.--One of the isolated blastomeres of the four-cell stage, is divided at the next cleavage by a plane which...
