

## City school expenditures and interrelation of the various items Volume 5

Filesize: 7.31 MB

### ***Reviews***

*This pdf will not be simple to start on reading through but extremely enjoyable to see. I have read and i also am sure that i will planning to read through again once more in the foreseeable future. You wont really feel monotony at whenever you want of the time (that's what catalogues are for relating to if you request me).*

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 Excerpt: . . . lie. A single exceptional case may double the range within which all of the cases lie, but manifestly this does not double the variability of the group. This figure, which we call 2 Q, is found by counting in from both the upper and lower limits until 25 of the cases have been covered, and then finding the range within which the remaining 50 of the cases lie. For instance, in Table X, in which there are 58 cases, we count off from the lower limit fifteen cases (25 -14), which brings us to the group of three cities which spend 58 of their money for teaching; in like manner, counting from the other extreme, 25 of the cases are found to spend more than 67 of their money for teaching. The limits within which the middle 50 of the cases lie are, then, 58 and 67, and 2 Q equals (67--58) 9. After we have found the 2 Q, the relation which it bears to the median gives us a still better idea of the variability of the group. If it is desired to compare the variability of the group in several traits, the relation of the 2 Q to the square root of the median is more exact than either of the figures before suggested because this measure will be less affected by errors due to inaccuracy of measurements, or to the small number of measurements made. In the table below, 2 Q,...
