RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 60 pages. Original publisher: Stanford, Calif. : Stanford University, W. W. Hansen Experimental Physics Laboratory ; Washington, D. C. : National Aeronautics and Space Administration, 1990 OCLC Number: (OCoLC)61354919 Excerpt: . . . proton background is an unknown, reliable estimates have been made by Dave Thompson and Carl Fichtel 8 . 1. 6 A Treatment of the Problem The most significant hurdle to overcome in treating this back-ground problem is the calculation of its rate for a particular satel-lite design. If the calculation were simple, then the rate could be calculated and accounted for in any measurement. As was mentioned above, however, the vast majority of interacting pro-tons produce charged secondaries, so the vast majority of poten-tial background gamma rays are vetoed. In addition, the physics involved in a nuclear reaction is quite complex. Both of these facts indicate that a simple back-of-the-envelope calculation will not suffice to predict the background rate, although a simplified physical argument will be given later to augment a more detailed calculation. With access to powerful computers at SLAC and data on cos-mic ray composition, it has proven possible to predict the back-ground...

Reviews

Absolutely essential study publication. Sure, it is enjoy, nonetheless an amazing and interesting literature. I realized this book from my dad and i suggested this pdf to find out.

-- **Justus Abbott**

This publication may be worthy of a read through, and a lot better than other. It is among the most incredible book we have read through. Your daily life period will be change when you total reading this article publication.
