Electrical instrumentation and experimental techniques circuit (general higher education Eleventh Five-year national planning materials supporting the use of the book)

By MA XIN JIN

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 171 Publisher: Machinery Industry Pub. Date :2010-03-01 version 1. This book is the circuit. circuit and other related materials supporting the use of the book. Book combines courses in circuit theory and experimental knowledge of the contents of the theory associated with the circuit from the point of view. the use of more length on the structure of electrical instrumentation. characteristics and working principle. and on this basis. a more systematic description of the electrical knowledge and experimental techniques measuring circuit. For the current widespread use of electronic design automation (EDA) technology in the simulation. introduced Multisim7 to use the software. Finally. much of the length of the relevant experimental circuit based on a combination of experimental. comprehensive experiments and electrical instrument measurement experiment three plates. so that the teaching of the experiment have sufficient choice. help students practice ability. Contents: Preface Chapter 1. the classification of electrical instruments and electrical measuring 1.1 pointer instrument with electrical electrical measuring instruments 1.1.1 1.1.2 1.2 Classification of instruments commonly used in electrical instrumentation pointer composition 1.2.2 1.2.1 pointer...
