

Large Scale Machine Learning with Python

By Luca Massaron, Alberto Boschetti

Packt Publishing Limited, United Kingdom, 2016. Paperback. Book Condition: New. 235 x 190 mm. Language: N/A. Brand New Book ***** Print on Demand *****. Learn to build powerful machine learning models quickly and deploy large-scale predictive applications About This Book * This practical hands-on tutorial focuses on design, engineering, and scalable solutions in machine learning, using cutting edge techniques, tools, and solutions * The book uses popular languages and tools such as Python, Hadoop, and Spark * Through this book, you can learn to develop high-value applications with personalized recommendations to perform machine learning engineering at scale, and build state-of-the-art models Who This Book Is For This book is for anyone who intends to work with large and complex data sets. You should be familiar with basic machine learning concepts. Knowledge of Python, iPython, and command lines together with a reasonable level of mathematical maturity. A good background in statistics and computational mathematics is expected What You Will Learn * Apply the most scalable machine learning algorithms * Work with modern state-of-the-art large-scale machine learning techniques * Increase predictive accuracy with deep learning and scalable data-handling techniques * Work with a map reduce framework in Spark * Apply effective machine learning...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better then never. I found out this book from my dad and i encouraged this pdf to find out.
