Pub Date :2004-07-01 Pages: 325 Publisher: Higher Education Press title: Medicine Mathematical Statistics List Price: 22.60 yuan Author: Zhu Guoqiang editor of Press: Higher Education Press Publication Date :2004-7- 1ISBN: 9787040140019 word count: 520.000 yards: 325 Edition: 1 Binding: Paperback: Editor's Choice book is no longer reprint or change the new version. Summary This book is a general higher education 15 national planning materials. to adapt to the rapid development of education in China and the rapid development of the discipline of statistics came into being. This book briefly describes the most basic probability and statistical methods. Total of nine chapters divided into random events and their probability. random variables and their distribution. the numerical characteristics of random variables. random sampling and sampling distributions. sampling estimation. hypothesis testing. analysis of variance. orthogonal experimental design and analysis. correlation and regression analysis . Characteristics of the book covers a wide range of ethical layman. And compared to the existing pharmaceutical mathematical statistical methods is a significant improvement and enrichment. both adhere to the traditional mathematical statistics. and expansion of some useful statistical methods. is conducive to the convergence and communication of mathematical statistics and health statistics. The book for teaching materials to use for the Bachelor of Medical Colleges of Pharmacy (containing Upgraded). also available for non-pharmacy undergraduate and graduate students chosen. scientific and technical personnel engaged in medical and health work. study reference. Total probability formula of Contents Chapter random events and their probability first section of random events and their computing the probability of the probability of the third quarter of Section II of random events the fourth quarter of the basic algorithms and inverse probability formula exercises a...
