Visual Anatomy Physiology (Hardback)

By Frederic H. Martini, William C. Ober, Judi L. Nath

Pearson Education (US), United States, 2014. Hardback. Book Condition: New. 2nd Revised edition. 282 x 241 mm. Language: English . Brand New Book. A Visual Approach to Two-Semester AP Visual Anatomy Physiology combines a visual approach with a modular organization to deliver an easy-to-use and time-efficient book that uniquely meets the needs of today's students without sacrificing the comprehensive coverage of AP topics required for careers in nursing and other allied health professions. The Second Edition addresses tough physiology topics with new and revised two-page modules and corresponding new Coaching Activities in MasteringAP(R). Brand-new end-of-chapter study and practice materials include a narrative Study Outline and comprehensive Chapter Review Questions. Module Reviews and Section Reviews, appearing throughout each chapter, give students additional tools for learning. In response to the strong demand from AP instructors, a brand-new Visual Anatomy Physiology Lab Manual uses the same visual approach and modular organization to help students succeed in the lab. This program presents a better teaching and learning experience by providing: *Personalized learning with MasteringAP: Engage students with new tough topic Coaching Activities and a wide range of other question and activity types-all automatically graded. *A visual approach and modular organization: The two-page modules seamlessly integrate...

Reviews

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Brennan Koelpin**

Comprehensive guide! Its this type of very good read through. It is actually written in simple words and phrases rather than difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.
