

## Our Young Dying Sun: An Apologetic View of Our Sun's Formation, Function and Future (Paperback)

By Ph.d. Cameron J. Grysen

Createspace Independent Pub, 2015. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Presently retired after 32 years with the Houston Police Department, Dr. Grysen brings his investigative experience as a former detective and his more recent training as a Christian apologist to take a fresh look at our sun. He received a Doctor of Biblical Studies from Trinity Graduate School of Apologetics and Theology, and a PhD in Christian Apologetics from Newburgh Seminary. Dr. Grysen enjoys searching out the evidence God has left behind in our universe. He believes God wants to make Himself known to mankind, through both His Creation and a literal interpretation of His Word, the Bible. He believes the more we understand about God and what He has done, is doing, and will do, the more we will turn to Him and not be afraid no matter what happens in our universe. Dr. Grysen follows the evidence and makes the case for a created sun that is functioning according to the Plasma Cosmology/Electric Universe model. By comparing Scriptural prophecy and scientific evidence, he explores what we can expect from our sun in the future.
