These values do not tell the whole story concerning the acoustical efficiency of the materials, since other qualities must also be considered. The pressed fiber, for instance, is of little value acoustically because its sound absorbing power is very small. Lseries OpenOeomey ThKn J3 0fitottnolinloytrs Fig. 1. Percentage of sound stopped by materials. Curve9 showing the percentage of sound stopped by different materials. The curves for the 4 in. paper-lined hairfelt show that this sample acts differently than the others. Two layers of this material stop less sound than one layer. Repeated measurements gave the same puzzling result. The in. cork board, shows the same phenomenon, but to a less degree. After some consideration, it was decided to investigate other acoustical properties of the samples to see if additional data would explain this anomalous transmission. If incident sound falls on a material,...
