DIGITAL WATERMARKING FOR SECURING FINGERPRINT DATA

Khalil Zebbiche
Digital Watermarking For
Securing Fingerprint Data
Concepts, basics and New methods

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Concepts, basics and New methods | Biometric-based systems are receiving an increasingly important interest since they are more reliable and more user-friendly than the traditional counterpart systems. Among various available biometric-based systems, fingerprint is the most mature, extensively studied and widely deployed biometric modality. Although fingerprint systems are considered to either replace or enhance the security of traditional systems, they are not fully secure since the integrity of fingerprint data is vulnerable..
