Micah Publications, United States, 2006. Paperback. Book Condition: New. 279 x 211 mm. Language: English Brand New Book ***** Print on Demand *****.This is the first and only book written about the United States Department of Transportation / National Highway Traffic Safety Administration (USDOT/NHTSA) final rulemaking for the most important safety counter-measure in vehicle and highway history -- the event data recorder. The author is widely recognized as a leading researcher on vehicle black box technologies. The book provides useful information for motorists, attorneys, public safety advocates, public policy administrators, engineers, automotive professionals, journalists, and insurance executives. BLACK BOXES? Millions of motorists crash - few realize vehicles record crash data! This is the first and only book written which details the final National Highway Traffic Safety Administration (NHTSA) rulemaking for Event Data Recorders (EDRs). It is useful information to anyone who drives or rides in motor vehicles and that includes almost everybody. To date, there have been hundreds of news and magazine articles, and numerous radio and television stories -- but only three books written exclusively about how and why modern-day motor vehicles use on-board EDRs. This book picks up where the other books left off and covers history, research, legislation and regulation. The information needed to understand the technology and to answer motorists questions and concerns about the widespread use of EDRs are provided, including: . Detailed bibliography and glossary . Examination of the unique legal and privacy issues . List of vehicles that have automatic recording capabilities . Chronological summary of key events . Glossary of Acronyms and Abbreviations My objective is to debunk myths, mystery and misinformation. You many wonder: . Whatis an Event Data Recorder (EDR)? . What is the difference between an EDR and a black box common to airplanes? . Why are automakers installing...
