University of Washington Press. Paperback. Condition: New. 136 pages. Dimensions: 9.0in. x 6.0in. x 0.4in. Every year thousands of people visit the San Juan Islands off the coast of Washington State. With a copy of Exploring Coast Salish Prehistory in hand, they will enjoy an introduction both to archaeology in general and to sites within San Juan Island National Historic Park. The Coast Salish people inhabited the San Juans for 5,000 years. One important site on San Juan Island, Cattle Point, was a summer camp where residents engaged in fishing and shellfish harvesting. Native peoples' recollections of activities there have been confirmed by physical evidence in the form of shell middens, fish bones, and other artifacts. Another San Juan site, English Camp, was a winter village site for 2,000 years. Structural remains provide insight into how peoples' lives and activities changed over time. Tools found at the site have allowed archaeologists to deduce that early residents ate camas bulbs and other plants, engaged in woodworking, weaving, fishing, and carving, and manufactured and used stone tools. Steins' discussions of the sites and archaeological practices are enhanced by numerous illustrations. Clear photos of different types of artifacts, topographical maps, and other images help the reader to understand how people lived in the San Juans thousands of years ago. Julie K. Stein is a curator of archaeology at the Burke Museum of Natural History and Culture; professor of anthropology; and divisional dean of computing, facilities, and research in the College of Arts and Sciences -- all at the University of Washington. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
