MATHEMATICAL MODELING OF GUIDED WEAPONS FOR AUTOPILOT DESIGNING

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Requirements for next generation guided weapons, particularly with respect to their capability to engage high speed, highly agile targets and achieve precision end-game trajectory has prompted a revision of the way in which the guidance and autopilot design is undertaken. This book considered the derivation of mathematical models for a missile autopilot for autopilot in State Space form. The basic model developed was highly nonlinear and is difficult to analyze analytically. Therefore...

Reviews

This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Michael Spinka**

It in one of the best publication. it was writtern extremely flawlessly and valuable. I am easily could get a delight of looking at a created pdf.
