Chapter 1: Introduction Before obtaining a license to operate a nuclear power plant, the licensee Decommissioning must agree with NRC to decommission the plant after the plant has been Regulations Outline permanently shut down. NRC established its decommissioning requirements in regulations issued in 1988. Under these regulations, NRC Technical Procedures expected that decommissioned sites, with rare exceptions, would reduce levels of radiation to allow the plant site to be released for unrestricted use once the license was terminated. Licensees had two decommissioning 3 alternatives. They could either begin major site decontamination and dismantling activities shortly after the termination of operations or maintain the plant and site in a safe condition up to several decades before dismantling the plant. Delaying full-scale decontamination and dismantling activities could be advantageous if ( 1 ) more time was needed to accrue decommissioning funds by continuing to collect funds from ratepayers after the plant has closed; ( 2 ) other units...
